|-------------------------|------|

**The British Standards Institution  
specifies a normal shear strength  
of 80 lbs. per square inch for  
mastic tile adhesives.**

**BALTAD'S** shear strength  
is over 300 lbs. per square inch.

Leading ceramic tile manufacturers backed the development of BAL-TAD. They wanted a tile adhesive they could recommend with complete confidence. BAL-TAD is the product of many years of intensive research. For its job, on a clean, flat and dry interior surface, BAL-TAD is an outstanding adhesive. It's simple to use, can withstand high temperatures (up to 212°F) — and can be re-constituted even after storage in temperatures as low as 10° frost.

For exterior surfaces, thick-bed fixing, floors, or special situations you may need to use our other products: BAL-FLEX, C.T.F., BAL-MIX and BAL-FLOOR. For grouting—BAL-GROUT—a compressible white cement suitable for all normal wall tile installations.

If you would like to obtain the free leaflet on BAL-TAD or on any of these products, or would like to make use of our free technical advisory service on all aspects of ceramic tiling, write to:

**BUILDING ADHESIVES LIMITED, Federation House, Stoke-on-Trent**
